

# WELLNESS SERIES

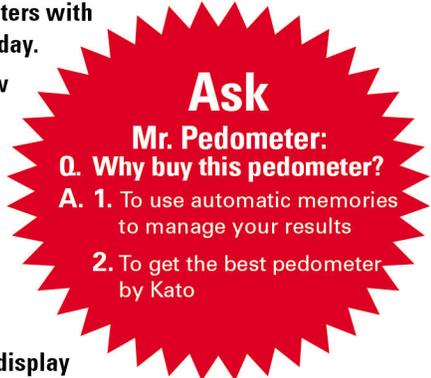

AH100

## AH100 Pedometer Series

### Accurate, High Quality Pedometers

- ACCUSPLIT is proud to bring you new memory pedometers with the highest accuracy rating available on the market today.
- These pedometers draw on the power of the brand new Kato-Sutton 10 (KS10) PedometerEngine™.
- The KS10 Step Sensor was developed by the world's foremost pedometer expert, Y. Kato, and ACCUSPLIT's own W. Ron Sutton.
- The AH190M28 has memories for steps, distance, and calories for the current day, previous seven days, and totals. It also includes an activity timer.
- The AH120MAG is a steps-only model with MAGNUM display digits—our largest ever!
- All 3 pedometers include quality features such as a sturdy metal belt clip, long-lasting Lithium battery, and large display digits.
- Backed by ACCUSPLIT's 5-Year Dual, No Proof and Proof of Purchase Limited Warranty.

### AH100 Series Packages Include:

- > AH100 series Pedometer
- > Most accurate mechanical PedometerEngine™ 99%
- > 3-Way Pedometer Leash System

Sturdy, built-in metal clip
